Outskirts Press, United States, 2010. Paperback. Book Condition: New. 274 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****. Autism, Therapy and Fun; OT to the Rescue is a collection of engaging activities that are versatile enough for use with individuals or groups of mixed ages and abilities. It is intended for children with adaptive functioning levels in the two- to five-year-old range. The activities were developed to enhance skills that often challenge children with autism and other special needs including fine motor, visual processing, body awareness/motor planning, sensory processing, self-help, and cognitive skills. Children aged 2 through 17 years with autism, ADHD, sensory processing disorders, feeding concerns, Down syndrome, and speech-language delay have successfully participated in these activities. Each activity in Autism, Therapy and Fun; OT to the Rescue includes a Leader Guide, Parent Information Handout, and supplemental materials, when appropriate. The Leader Guide provides a list of materials needed, detailed instructions, and helpful hints. The Parent Information Handout explains the rationale, process, and skills emphasized, helping parents be informed members of the team. Supplemental materials such as templates, diagrams, and pictures are also included. Autism is a developmental disability that affects how the brain functions, and often impairs social skills development and communication. Occupational therapy practitioners work collaboratively with the...
