Executive Summary In January 2002, the conversion factor used to translate relative values into payment amounts under the Medicare physician fee schedule was decreased by 5.4 percent, raising concerns about Medicare beneficiaries access to physician services. MedPAC sponsored a national survey of physicians to monitor the impact of the physician fee schedule changes and assess other possible changes in physicians practices. This survey provides data on physician satisfaction, concern about various aspects of physician practice including reimbursement and regulatory burden, acceptance of new patients, and changes in practice style. The survey is one part of a larger, ongoing effort by MedPAC to monitor beneficiary access to care. Data collection began in early April 2002, after physicians had had time to learn about and react to the Medicare payment changes, and continued through August. Completed surveys were obtained from 782 physicians, representing a response rate of 51.3 percent. Key findings are: Physician Satisfaction Despite the Medicare payment declines and other often-cited problems with medical practice, such as malpractice issues and regulatory burden from insurers, physicians overall satisfaction with the...
