

Noise Levels and Sources in the Stellwagen Bank National Marine Sanctuary and the St. Lawrence River Estuary

By U. S. Department Of Commerce

CreateSpace Independent Publishing Platform. Paperback.

Book Condition: New. This item is printed on demand.

Paperback. 32 pages. Dimensions: 11.0in. x 8.5in. x

0.1in. Ambient noise in the ocean is a topic that has been widely

studied since the 1940s. Over the last 25 years the effects of

noise on marine organisms has become a concern. The

primary issue has been the potential of noise to adversely

affect marine mammals. The Stellwagen Bank National Marine

Sanctuary (SBNMS) and upper estuary of the St. Lawrence

River are sites where the degradation of habitat due to

increasing noise levels is a concern because they are feeding

grounds and summer havens for numerous species of marine

mammals. In an effort to provide information for better

sanctuary management this report describes the current

understanding of ambient noise and existing levels of ambient

noise and its relationship to marine mammals in the

Stellwagen Bank National Marine Sanctuary and the

designated marine park area of the Upper St. Lawrence River

Estuary. This item ships from La Vergne, TN. Paperback.
